

Denny John, MBA, MPH, FRSPH, FRSTM&H
Evidence Synthesis Specialist, Campbell Collaboration

Denny has over 12 years of experience across various domains; managing hospitals and health projects, economic evaluation, health financing, evidence synthesis, implementation research, teaching and advocacy. He is currently working as Evidence Synthesis Specialist with the Campbell Collaboration, and is based out of New Delhi. He has experience of working with development organisations, insurance companies, and healthcare consulting for conducting economic evaluation, systematic reviews, and disease forecasting studies. His experience spans of working in India and Nepal, and supporting community health financing projects in Bangladesh, Tanzania, Nigeria, and Ghana. He has been the Principal Investigator/Co-Investigator for over 15 research studies conducted across various states in India, and has been awarded several research and project grants from national and international bodies. In 2013, he received CAD\$113000 research grant as part of the Stars in Global Health program, Grand Challenges Canada. He has experience of working/consultant on projects funded by national and international donors, such as World Bank, Bill and Melinda Gates Foundation, Misereor (Germany), Save the Children (Germany), Malteser International (Germany), Oxfam, DFID, and 3ie.

He has published over 25 articles, and presented in national and international forums in the field of cost-effectiveness analysis, systematic reviews, and health financing. He is co-author of the first proposed 'Pharmacoeconomic and Outcomes Research Guidelines for India'. He is Associate Editor-International Journal of Technology Assessment in Health Care (IJTAHC), and reviewer for Bulletin of the World Health Organisation, Journal of Public Health, Value in Health-Regional Issues, Patient Experiences Journal, and reviews of the Cochrane Collaboration. He has been a co-guide to MSc and PhD students for topics on economic evaluation, evidence synthesis, and public health nutrition.

He has a Master of Public Health (MPH) from University of Auckland, New Zealand (recipient of Commonwealth Scholarship), MBA in Hospital Management from Institute of Health Management Research (IIHMR), Jaipur, and Bachelor of Physiotherapy from Mangalore University. He is Fellow of Royal Society of Public Health, and Royal Society of Tropical Medicine and Health, in the UK, 2015-17 Chair-Elect for ISPOR Asia Young Professionals Group, and member of Cochrane and Campbell Economic Methods Group (CEMG).
